Uploading a Video to Vimeo

Head to Vimeo.com and create an account for yourself. Make note of the e-mail and password you used to create this account—you’ll need them to log in when you start your upload!

From your video editing screen, tap this button to get back to the main iMovie screen. This is where you can manage and export all your projects.

You can tap here to edit your video’s title before you upload.

Tap the “Arrow” icon at the bottom of the screen to view your export options.

Choose “Vimeo”. Log into Vimeo using your e-mail and password you created when setting up your account.

Enter metadata details about your video. Set “Viewable by” to “Anyone” if you want everyone in your class to be able to view it. (Note: If you have specific privacy concerns, talk with your instructor for an alternative upload option.)

Tap “Share” to start uploading your video, and give it some time. When the upload is finished, you should see a confirmation pop-up. Tap “Visit” to view your video in a web browser.

It will take a while (sometimes 30 min. or more) for your video to process. Once it’s finished, you will be able to share the video using the link at the top of your browser window. You can copy and paste this into Moodle to share with your class!
