

# Sharing an iMovie project file

Last update 10 January 2013

With the aid of a computer (PC or MAC) project files (movie projects in the iMovie app) can be shared from one iPad to another iPad so that group members can collaborate on their projects.

## Upload project file to iTunes (iTunes 11 or newer)

1. Open iMovie on the iPad

2. With your project in lights tap **Share**

3. Tap **Send Project to iTunes**

4. Connect iPad with project file to a computer (PC or MAC)

5. Open iTunes on the computer

6. Select iPad

7. In the iTunes menu select Apps

8. Under File Sharing, Select iMovie  
(You may need to scroll down on the page)

9. In the iMovie Documents menu  
Click Add (You may need to scroll down)  
Your project should appear in the menu

10. Drag your project to the desktop or click **Save to**  
11. In iTunes, click the **eject** symbol and then  
disconnect the iPad from the computer

## Share Project file to Dropbox
